PROJECT:

- **Title** : “Detection and conversion Amharic text to English sentences in Hand Written Images Using Convolutional Neural Networks”
- **Description** : Amharic language is one of the oldest languages in this world since 12th century. With more than 50 million speakers, this language serves as the official working language of the Ethiopians. We will build a system which uses the CNN based algorithms such as LeNET-5 and ResNet-152 for extracting the Amharic text from images and converting them to the English sentences which the machine already trained.
